KPMG
Hiring Committee
Canada

Dear Hiring Committee,

Re: Generative AI / Power Platform Developer, Req ID: 28850

KPMG's commitment to integrity, excellence, courage, collaboration, and doing what matters aligns with my passion for using technology to make a meaningful difference. I am a fourth-year Computing Science co-op student at Thompson Rivers University with practical experience in creating Power Platform automations, applications, and integrations that enhance operations and stakeholder results.

In my recent Business Technology Analyst Co-op at BCLC, I developed and implemented Microsoft Power Automate solutions that saved managers and teams over 100 hours each month and automated records processes across 10 business units, cutting manual work by 85% and saving 12 operational hours weekly. I also led a small hackathon to deliver a SharePoint tag policing automation, which improved data accuracy by 40%. These projects demonstrate courage, collaboration, and my ability to translate business needs into scalable Power Platform solutions, manage stakeholders, and achieve measurable efficiency improvements.

My role as a Large Language Model Evaluator at DataAnnotation Tech has enhanced my problem-solving skills and proficiency in Python and JSON, ensuring high accuracy and efficiency in code assessment. My academic background and project work further support my practical experience. Currently, I am leading a team to develop a digital onboarding system for Acres Enterprises using Power Apps, Power Pages, and Power Automate. This system aims to simplify new employee onboarding and automate manual HR tasks, creating a more efficient and organized process. These experiences have strengthened my understanding of how technology can drive positive change, a value that deeply resonates with KPMG's principles of integrity, excellence, courage, teamwork, and striving for better outcomes.

Thank you for considering my application. I look forward to bringing my Power Platform development skills, generative AI evaluation abilities, and collaborative approach to KPMG.

Sincerely,
Angel Masano
